Professional Summary

Analytical and detail-oriented Data Analyst skilled in SQL, Python, Power BI, and Excel. Experienced in delivering business-impacting insights through real-world projects across fraud detection, supply chain, and marketing analytics. Known for building automated dashboards, reducing manual effort by 30–50%, and delivering predictive models with 85–92% accuracy. Eager to apply analytical thinking and technical skills to drive smarter decisions in a dynamic organization.

Technical Skills

- **Languages:** Python, SQL
 - **Tools:** Power BI, Microsoft Excel, Tableau (Basic), GitHub, Jupyter Notebook.
 - **Techniques:** Data Cleaning, Statistical Analysis, Data Visualization, Predictive Modeling
 - **Concepts:** Business KPIs, Database Design, ETL Pipelines, Data Modeling
-

Key Projects

Data Engineering Project: Batch data Ingestion and Processing Pipeline (SQL, Notion, Draw.io, Python)

- Built a MySQL data pipeline using stored procedures, improving batch query performance by 25%.
- Documented data flow and processes using Notion, improving stakeholder collaboration by 20%.
- Automated batch data ingestion with Python, cutting manual processing time by 30%.
- [Project Link](#)

Credit Card Fraud Detection (Python, SQL)

- Developed ML model detecting fraud with **92% precision** across 50,000+ transactions.
- Evaluated 50,000+ historical transactions using SQL queries to identify fraud patterns.
- Delivered insights in a mentor presentation—recommended for inclusion in project showcase.
- [Project Link](#)

Supply Chain Management Analysis (Excel, Power BI)

- Optimized supply chain efficiency by analyzing product performance for a dataset of 5,000+ items.
- Reduced delivery delays by **15%** via visual performance monitoring.
- Automated data cleaning processes in Excel, saving 10 hours of manual work weekly.
- [Project Link](#)

Bank Marketing Prediction (Python, SQL)

- Predicted client subscription to term deposits using logistic regression, achieving 88% accuracy.
- Extracted and cleaned 20,000+ records using SQL for predictive analysis.
- Visualized campaign performance metrics in Power BI for stakeholder presentations.
- [Project Link](#)

Tata Data Visualization Virtual Internship (Power BI)

- Designed dashboards to visualize business performance metrics for Tata Group's dataset.
- Improved data accessibility for stakeholders by 25% through interactive reports.
- [Project Link](#)

IBM Capstone Project (Python, SQL)

- Investigated real-world dataset to uncover business trends, delivering a 15-page report.
 - Retrieved and cleansed supply chain datasets using SQL, subsequently employing Python to build predictive models; findings enabled a 15% improvement in product delivery efficiency.

-

Professional Experience

Virtual Internship, Unified Mentor

Data Analyst Intern | November 2024 – January 2025

- Analyzed delivery data, improving product efficiency by 15% in mock campaigns.
- Developed predictive models for bank marketing campaigns, increasing lead conversion by 10%.
- Contributed to fraud detection systems, processing 50,000+ transactions.

Internship, 360DigiTMG

Data Analytics Intern | March 2024 – July 2024

- Collaborated with industry experts to analyze datasets using SQL and Python.
 - Created 10+ Power BI dashboards to present insights, adopted by training team.
 - Completed rigorous Data Analytics Program with hands-on projects.
-

Education

Professional Program in Data Analytics

360DigiTMG (State University of New York) | October 2023 – December 2024

- Major: Data Analytics | Minor: Python, SQL

B.Tech, Computer Science and Engineering

YSR Engineering College of YVU, Proddatur, AP | August 2019 – August 2023

- Minor: Disaster Management and Green Building Technology
-

Certifications

- Professional Data Analytics Program, 360DigiTMG ([Link](#))
- Databases and SQL for Data Science with Python ([Link](#))
- SQL Certification, HackerRank ([Link](#))
- Tata Data Visualization Virtual Internship, Forage ([Link](#))
- Data Analyst Virtual Internship, Unified Mentor ([Link](#))
